Service Overview

Protecting your company's data is a necessity. Unfortunately, disaster do happen, recovery times and long terms effects on a company business operation depend on a successful backup and recovery strategies.

Backup is the process of creating copies of your data or whole systems to help prevent data loss. Recovery is a procedure of restoring data from backup files to its original location.

The primary purpose of backup and recovery is to prevent data loss caused by data corruption, hardware or software failure, malicious attacks (virus or malware), or accidental data deletion.

There is no one-size-fits-all backup and recovery solution. Our solution adapts to specific customers' needs and compliance requirements.

Backup and Recovery Benefits

Our off-premise backup and recovery solution brings unmatched scalability, reliability, and cost control.

Off-premise Location

If your environment is compromised, you can recover your data from a secure off-premise location.

Cost Control

Our solution is very cost-effective and enables you to reduce implementation and maintenance costs.

Scalability

The scalable architecture enables your to scale up or down very effectively as your needs change.

Compliance and Business Continuity

Our backup solution is designed to satisfy compliance and business continuity requirements.

Reliability

Our backup solution is built with several layers of redundancy and availability.

A person wearing a white lab coat and gloves is working on a server rack. The image is overlaid with a solid blue color. The text is centered in the upper half of the image.

Keep your critical data safe with
our scalable and secure backup and
recovery solution!

Backup and Recovery Features

Our backup and recovery solution is designed for a large number of use cases and offers many interesting features.

Server Image Backup

Backup and quickly recover your system from server images.

File and Folder Level Backups

Backup only important files or folders within your systems.

All OS Supported

Our backup and recovery solution works with any operating systems.

Snapshots Backup

Our service supports VMware, Hyper-V, and Amazon EC2 Snapshots.

Incremental Backups

Backups are saved incrementally, helping keep backups smaller.

Backup Compression

Backups are compressed for additional backup file downsizing.

End to End Encryption

The whole backup procedure is safe and encrypted end-to-end.

Multiple Backup Locations

You can choose from multiple backup locations based on your needs.

Minimal Downtime

The solution is designed to help you minimize downtime.

Why Should You Work With Us?

We are a team of IT experts focused on providing high-end IT services based on cloud technology. With the right amount of knowledge, experience and quality, we continually deliver successful IT projects.

 **Advanced Consulting Partner**

AWS Advanced Consulting Partner

Heptabit is one of the four largest AWS partners in the CEE region. As a client, you receive the service according to rigorous AWS quality standards.

Flexibility

Our infrastructure and operations teams are composed of people with vast experience across many different industries and technologies.

Knowledge and Expertise

Our certified AWS and VMware experts are here to deliver IT solutions based on the industry's best practices.

Technology Partner

We act as your technology partner, helping you solve real business problems and deliver concrete benefits.

High Quality

Our services are compliant with industry-leading IT management and cloud/information security ISO standards.

Contact Us

If you have any questions, do not hesitate to contact us.
We shall be glad to help you!
