Service Overview

We are facing exponential data growth; this trend presents significant challenges for businesses around the world.

Modern machine learning and analytics services process unstructured data to bring value to customers. Regulatory compliance requires long retention periods. Customers need data archive and digital preservation services with fast retrieval times, enhanced data durability, fine-grained security, superior compliance options, and greater data accessibility for advanced analytics and business intelligence.

Our data archive and digital preservation service are based on AWS's cloud storage services for long-term retention, digital preservation and compliance.

**Protect your critical
business data with our
data archive and digital
preservation services!**

Benefits

Our services are built to eliminate operation complexities, satisfy compliance requirements, improve business agility, and data protection.

Low Cost

AWS archival storage solutions start from \$1 per terabyte per month; this is lower than most customers' on-premises infrastructure.

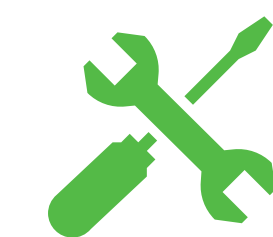

Compliance Requirements

With AWS's regular third-party validation for thousands of global compliance requirements, you can simply meet your compliance requirements.

Agility

You can easily extend existing cloud capacities or deploy new services that leverage the asset archive.

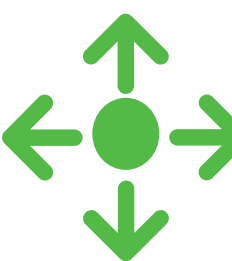

No Hardware Management

With our services, you simplify data archiving and eliminate operational complexities of managing on-premises infrastructure.

Data Protection

Data stored on AWS is highly available, 99.99999999% durable, and highly protected against degradation or corruption.

Unlimited Scale

With AWS, you can meet unpredictable capacity demands driven by the exponential data growth without large upfront capital investments.

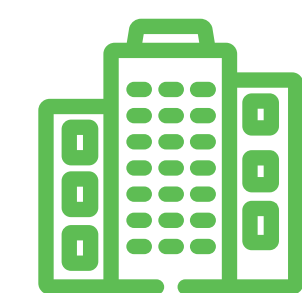

Use Cases

Our services fit many use cases, ranging from media companies, to highly regulated financial institutions.

Compliance Archive

Companies inside highly regulated industries such as Financial Services, Healthcare, and Public Sector are required to retain data for more extended periods. To help you meet your business compliance and regulatory purposes, AWS supports many security standards and compliance certifications, such as PCI-DSS, HIPAA/HITECH, FedRAMP, GDPR, FIPS 140-2, and NIST 800-171.

Enterprise Backups

The cost of enterprise backups can be significantly reduced by migrating tape libraries and storage appliances to the AWS cloud.

With AWS archive solutions, there are no upfront costs, hardware maintenance costs are eliminated, and significantly faster access is provided when archived data is needed.

Media Asset Preservation

Media asset companies need cost-efficient, highly durable, and massively scalable storage for storing infrequently accessed digital media assets.

Data can be quickly moved from archive to the distribution when needed, and insights can be quickly extracted by accessing adjacent AWS services such as AWS Elemental Media Services, AWS Lambda, Amazon Elastic Transcoder, and Amazon Rekognition.

Disaster Recovery

Disaster recovery needs can be easily met by replicating data to a secondary region. If one region fails, data can be retrieved from other region.

AWS archival solutions deliver unmatched durability and resilience and simplify the organization's offsite data storage.

**Archive your
data with AWS
and save time
and money!**

Related AWS Services

With various AWS services, we design low-cost data archive and digital preservation solutions with unmatched features, speed, and scalability.

Amazon S3 Glacier

Low cost, secure, durable storage service for active archives.

Amazon S3 Glacier Deep Archive

Lowest cost storage service designed for long-term data archives.

AWS Storage Gateway

Hybrid cloud storage service for on-premises access to virtually unlimited cloud storage.

AWS Snow Family

Petabyte-scale data transport service with on-board storage and compute capabilities.

AWS DataSync

Files transfer service for file transfer to and from AWS up to 10x faster.

Why Should You Work With Us?

We are a team of IT experts focused on providing high-end IT services based on cloud technology. With the right amount of knowledge, experience and quality, we continually deliver successful IT projects.

 **Advanced Consulting Partner**

AWS Advanced Consulting Partner

Heptabit is one of the four largest AWS partners in the CEE region. As a client, you receive the service according to rigorous AWS quality standards.

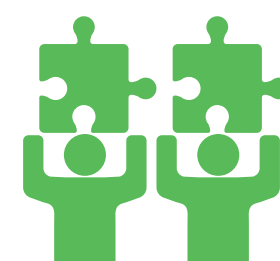

Flexibility

Our infrastructure and operations teams are composed of people with vast experience across many different industries and technologies.

Knowledge and Expertise

Our certified AWS and VMware experts are here to deliver IT solutions based on the industry's best practices.

Technology Partner

We act as your technology partner, helping you solve real business problems and deliver concrete benefits.

High Quality

Our services are compliant with industry-leading IT management and cloud/information security ISO standards.

Contact Us

If you have any questions, do not hesitate to contact us.
We shall be glad to help you!
